

Mini-Edge Platform

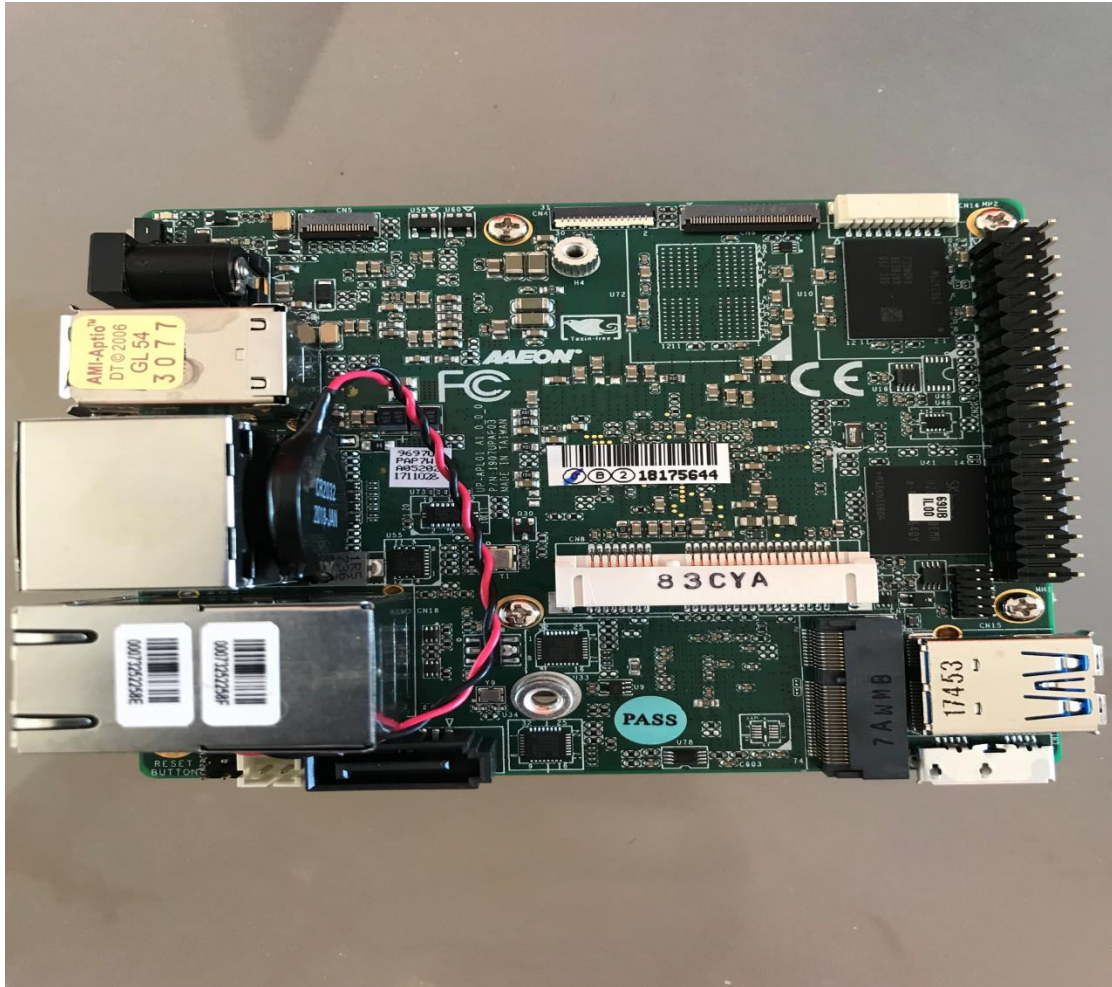

Mini Edge Platform Features

- Fully proprietry product
- NB IoT Module
- Based on 5G telecom network protocol
- Inbuilt GPS location sensor
- Portable RTOS based AP
- 5G Modem certified for use in EU
- In built temperature & Humidity sensor
- iSim & SIM based connectivity
- External sensor connection option

Killer proposition

- Low cost
- Targeting ground field market (85% deployed asset)
- Out of the box configurable
- Connect to any 3rd party cloud

Edge Platform

Edge Platform Features

- Fully featured edge platform with inbuilt analytics
- Omni-channel Connectivity option (wifi, SIM, RJ45)
- Edge run-time on Linux
- Multiple sensor connectivity
- Multiple Gateway connectivity
- Supports MQTT, AMQP etc.
- Edge analytics
- Visual analytics support
- Runs Tensor flow ML
- Runs Snap ML for AI
- Multiple proprietry libraries (Event correlator etc)
- Multiple Cloud support
- Low power device
- Supports OTA
- Easy Deployment

Killer proposition

- ML Model portability
- Faster Model Training in real time
- Runs on open OS
- Proven platform in the market
- Most optimal & superior edge platform
- Best fit for on premise & on cloud platform
- Independent of cloud service edge
