

Jarvis - Next Gen IoT Edge System Designer Workbench

Jarvis IoT Edge System Designer Features

- Drag & Drop based IoT System Designer
- Digital twin Maker
- Low Code Generator Toolchain
- Supports OTA patch Generator
- Platform Configurator
- Portable Database Configurator
- Platform Independent Code Generator
- Virtual IoT System Simulator
- Event Co-Relator & Micro service architecture
- System Design Verification
- Docker & Kubernetes based deployment support
- ML Model selector
- Platform Feature Selector
- IoT Connectivity Connectors
 - MQTT
 - Zigbee
 - AMQP
 - CoAP
 - XMPP
 - WiFi
 - NB IoT
 - Satellite

Killer Proposition

- Drag & Drop design
- Design verification
- Design Model generation
- Low Code generation
- On the shelf ML Model deployment
- Business process integration
- Blockchain integration for cross design interaction
